

# Photography A/T

## Photography A/T Specialised Photography A/T

In a world where visual communication's significance is increasing, students are given vital 21<sup>st</sup> century skills to read and produce effective images. Photography students learn how to use cutting edge AI photographic tools, digital cameras, a photographic studio and high-end photographic printers and framing equipment. Photography is a powerful tool for students to explore the world and to express themselves

Students planning a career in a photographic field will have the opportunity to assemble a folio of work suitable for employment purposes or further study.

Photography A and T are designed to provide a firm basis of knowledge for aspiring photographers and for students studying related visual communication courses. Both courses give students scope for serious study of all aspects of photography.

## Photography A or T

Students can study Photography at either tertiary or accredited level.

## Course Patterns

Students can attain a minor (1unit each semester of a year of study) upto a double major (2x units each semester over 2 years)

## Units—Photography A/T
